

Administering Medication Policy

If a child attending TJ's Club (Hampshire) Ltd requires prescription medication of any kind, their parent or carer must complete a **Medicine** form on iPal in advance. Please contact your setting to discuss this and the administration requirements. Staff at the Club will not administer any medication without such prior consent. Ideally children should take their medication before arriving at the Club. If this is not possible, children will be encouraged to take personal responsibility for their medication, if appropriate.

Prescription medication

TJ's Club (Hampshire) Ltd staff will normally only administer medication that has been prescribed by a doctor, dentist, nurse or pharmacist. If a medicine contains aspirin, we can only administer it if it has been prescribed by a doctor. All prescription medication provided must have the prescription sticker attached which includes the child's name, the date, the type of medicine and the dosage.

Non-prescription medication

If a child requires a non-prescription medication to be administered, we will consider this on a case-by-case basis after careful discussion with the parent or carer. We reserve the right to refuse to administer non-prescription medication. Non-prescribed paracetamol and/or ibuprofen will only be given if permission has been granted via the child's iPal registration and its administration may prevent further complications (such as febrile convulsions) from occurring. We will also seek verbal permission from parents/carers before administering.

If children carry their own medication (eg asthma inhalers), the Club staff will offer to keep the medication safe until it is required. Inhalers must be labelled with the child's name; these are usually kept in their classrooms and can be sought if needed.

A designated staff member will be responsible for administering medication or for witnessing self-administration by the child. The designated person will record receipt of the medication on a iPal, will check that the medication is properly labelled, and will ensure that it is stored securely during the session.

Before any medication is given, the designated person will:

- Check that the medical form has been completed on iPal
- Take steps to check when the last dosage was given
- Ask another member of staff to witness that the correct dosage is given.

When the medication has been administered, the designated person must:

- Record all relevant details on the iPal medication form.
- Ask the child’s parent or carer to update iPal accordingly that the medication has been given.

If a child refuses to take their medication, staff will not force them to do so. Club management and the child’s parent or carer will be notified, and the incident recorded on iPal.

Specialist training

Certain medications require specialist training before use, eg Epi Pens. If a child requires such medication the Club owners will arrange appropriate training as soon as possible. It may be necessary to absent the child until such training has been undertaken. Where specialist training is required, only appropriately trained staff may administer the medication.

Changes to medication

A child’s parent or carer must update iPal if there are any changes to a child’s medication (including change of dosage or frequency) and discuss this with the staff at the setting.

Long term conditions

If a child suffers from a long-term medical condition the Club will ask the child's parents to provide a medical care plan from their doctor, to clarify exactly what the symptoms and treatment are so that the Club has a clear statement of the child's medical requirements.
