

First Aid, Illnesses, Infection Control and Accidents

At TJ's Club (Hampshire) Ltd we will promote the good health, including oral health of the children that we look after. We will deal promptly and effectively with any illnesses, accidents or injuries that occur while children are in our care. We take all practical steps to keep staff and children safe by taking appropriate action if children are ill or infectious. This keeps children and staff safe from communicable diseases.

All parents and carers must complete the medical information on iPal when their child is registered to join our club, including requesting permission for emergency medical treatment for their child in the event of a serious accident or illness.

We will record any accidents or illnesses, together with any treatment given, on an **Incident or Accident Record** on iPal, as appropriate, which the parent or carer will be asked to sign.

TJ's Club (Hampshire) Ltd cannot accept children who are ill or infectious. If any children are ill when they first arrive at the Club, we will immediately notify their parents or carers to come and collect them. Any children who have been ill or infectious should not return to the Club until they have fully recovered, or until after the minimum exclusion period has expired (see table at the end of the policy).

First Aid

All staff who work for TJ's Club (Hampshire) Ltd have a current paediatric first aid certificate and have attended a 12-hour paediatric first aid course, which complies with the requirements of Annex A of the EYFS. This training will be renewed every three years.

Two first aid boxes are easily accessible at every session. The lead playworker regularly checks the contents of the first aid boxes to ensure that they are up to date, appropriate for children and comply with the Health and Safety (First Aid) Regulations 1981.

The lead playworker ensures that the first aid kit is taken out when the children are playing outside.

Procedure for a minor injury or illness

The lead playworker will decide upon the appropriate action to take if a child becomes ill or suffers a minor injury.

- If a child becomes ill during a session, the parent or carer will be asked to collect the child as soon as possible. The child will be kept comfortable and will be closely supervised while awaiting collection.
- If a child complains of illness which does not impair their overall wellbeing, the child will be monitored for the rest of the session and the parent or carer will be notified when the child is collected.
- If a child suffers a minor injury, first aid will be administered and the child will be monitored for the remainder of the session. If necessary, the child's parent will be asked to collect the child as soon as possible.

Procedure for a major injury or serious illness

In the event of a child becoming seriously ill or suffering a major injury, the lead playworker will decide whether the child needs to go straight to hospital or whether it is safe to wait for their parent or carer to arrive, in consultation with the manager if needed.

- If the child needs to go straight to hospital, we will call an ambulance and a member of staff will go to the hospital with the child. The staff member will access the child's **Medical Form** (on iPal) and will consent to any necessary treatment (as approved by the parents on the **Medical Form**).

- We will contact the child's parents and carers with urgency, and if they are unavailable, we will call the other emergency contacts that we have on file for the child.
- After a major incident the manager and staff will review the events and consider whether any changes need to be made to the Clubs policies or procedures.
- We will notify Ofsted and child protection agencies in the event of any serious accident, injury, illness or death of a child in our care as soon as reasonably possible and within 14 days at the latest.
- We will notify HSE under RIDDOR in the case of a death or major injury on the premises (eg broken limb, amputation, dislocation etc - see the HES website for a full list of reportable injuries).

Infection control

Hand hygiene is one of the most important ways of controlling the spread of infections, especially those that children are especially susceptible to. We will ensure access to soap, warm water and paper towels are available at all times. In the case where this is not possible, alcohol hand gel can be used on hands that are not visibly dirty.

All children will be reminded to clean their hands after using the toilet, before eating and handling food and at other times as necessary (such as messy activities or if animals are present).

Our setting is cleaned regularly. We will take advice of the UKHSA health protection team should any outbreak of infection at our setting be noted.

TJ's Club (Hampshire) Ltd follows the advice set out in the UK Government guidance 'Health Protection in Children and Young People settings' on the prevention of infection, including Covid-19.

Communicable diseases and conditions

If a case of head lice is found at club, the child's parents or carers will be discreetly informed when they collect the child. Other parents will be warned to check their own children for head lice, but care will be taken not to identify the child affected.

If an infectious or communicable disease is detected on the Club's premises, we will inform parents and carers as soon as possible.

If there is an incident of food poisoning affecting two or more children looked after at the Club the Manager will inform Ofsted as soon as possible and within 14 days at the latest.

If there is an outbreak of a notifiable disease at the Club, we will inform the local health protection unit, HSE under RIDDOR (if appropriate), and Ofsted.
